Ultra-Efficient Infinity® Heat Pump Systems

WITH GREENSPEED™ INTELLIGENCE

COMFORT WITHOUT COMPROMISE.

TWO SYSTEMS:

Infinity® Control

1 ALL-ELECTRIC

Infinity® 20 Heat Pump

Infinity® Fan Coil

adaptable-speed technology + Infinity® intelligence

If you're looking for high-efficiency heating and cooling in one system, this is your formula for success. Our Infinity® heat pump systems with Greenspeed™ intelligence feature the high-efficiency Infinity 20 heat pump, maximizing the performance of adaptable-speed technology. Whether or not you appreciate the science, you'll love the savings.

We've raised the bar on lowering energy costs.

The Infinity® heat pump system with Greenspeed™ intelligence is an incredible feat of engineering. First of all, it delivers up to 13 HSPF heating efficiency — that's 29-69% greater than the competition.*

And while most manufacturers would be satisfied with unprecedented heating efficiency, Carrier knew to be truly breakthrough, the heat pump had to bring the heat as well. The Infinity 20 heat pump has up to 86% greater heating capacity than competitors.† So it can keep you cozy even when temperatures plummet into the teens.

And in the summer, the system delivers up to 20.5 SEER cooling and supreme dehumidification that rivals most high-efficiency air conditioners.

Infinity® 20 Heat Pump

Infinity® Control

ALL-ELECTRIC

Infinity® Fan Coil

*Based on 3-ton ducted air-source heat pump system combinations as of October 28, 2011.

†Compared to a 3-ton ducted air-source heat pump at an outdoor temperature of 17°F.

Uncompromised comfort and quiet.

The Infinity® heat pump system with Greenspeed™ intelligence is able to uniquely respond to the Infinity control's commands.

As outdoor conditions change the comfort demands inside the home over the course of a day or even an hour, a constant stream of information is exchanged between the Infinity control and the system. Adaptable-speed components backed by Greenspeed™ intelligence are able to take the control's commands and make very subtle adjustments to meet the comfort needs of the home.

This allows the system to operate longer at steadier, lower capacities. And, lower capacity runs means quieter operation. So quiet, you'll forget it's there.

Infinity® Control

Infinity® 20 Heat Pump

GAS-ELECTRIC

Infinity® 98 Gas Furnace

Depending on your geography and comfort needs, your Carrier® expert will help recommend either an all-electric system or a gas-electric HYBRID HEAT® dual-fuel system.

The Carrier® HYBRID HEAT® dual-fuel system with Greenspeed™ intelligence is an ideal choice for where long, cold winters are the norm. The Infinity® control talks to the system to determine when it is most economical to heat with the electric heat pump or the gas furnace. The heat pump also delivers highly efficient cooling—up to 20.5 SEER— in the summer months along with supreme dehumidification.
